For Immediate Release

Cigarmony, LLC is Granted U.S. Patent for Revolutionary Humidification Device

January 26, 2012 – Cigarmony, LLC, an innovator in humidification products, has been granted one or more U.S. Patents for its high tech humidification product.

“The Humidity Bead System is the ultimate solution for maintaining a precise level of relative humidity and having U.S. Patent protection solidifies that fact,” said Mark Neff, Cigarmony, LLC President and CEO. “While it’s currently being targeted for tobacco storage, there are many other applications for its use but cigar smokers are the immediate beneficiaries of this leading edge technology.”

“Over humidification of cigars is the single biggest problem with storage. Too much moisture creates a draw and burn problems,” said Mark Neff. “The Humidity Bead System takes the guess work out of cigar storage so users can focus on other things rather than constantly worrying if their prized collections are being stored properly.”

Cigarmony, LLC currently offers the Humidity Bead System 4 different sizes available in 2 pre-set humidity levels, 65% RH or 70% RH.

“These 4 sizes accommodate the widest range of storage applications possible. From the cigar novice to the cigar aficionado, we’ve got them covered,” Mr. Neff adds.

Cigarmony, LLC, founded in 2005 and headquartered in Potomac Falls, VA, provides creative and innovative products for the cigar industry. Their Humidity Bead System being their flag ship product is well-known internationally and is currently available in the U.S., Canada, the United Kingdom, Germany, Austria, Switzerland and Australia with plans to expand U.S. distribution and branch out to Asia.
